

CAPE CARANCAHUA WSC SPLASH NEWSLETTER

Volume 4/Issue 1

NEWS ALERT

Winter Weather Advisory

Frigid temperatures are looking more and more likely for much of Texas coming up next week. This Saturday, an [arctic front](#) is expected to pass through the Houston area, ushering in the coldest air of the season for the beginning of next week.

Please make sure you winterize your pipes and before you leave the Cape for an extended period of time turn your water off on the customer side. We have suggestions on our website on how to protect your pipes under the education page.

Stay warm and be safe!

CCWSC WATER DEPARTMENT HIGHLIGHTS

What's happening this month

➤ **CCWSC will not have a price increase this year.** There was a post out on Nextdoor about our rates going up, but this is not the CCWSC, it is Boca Chica Tri County. If Tri County gets their rates approved by TPUC then it will be \$35.00 higher per month for water then CCWSC.

➤ We wanted to let the community know that an anonymous property owner gave a special Christmas gift to three in need water customers by paying for their water service for December. This is such an amazing act of kindness during a time that can be very difficult for some during the holidays. Thank you!

➤ The last pressure tank refurbishment is now complete and the outside of the tank has been painted. All three tanks now are in brand new shape. We will sanitize the tank and take bacteriological tests before we put the tank back into service.
